2015 WHOLE CLUSTER PINOT NOIR

WHAT IS WHOLE CLUSTER FERMENTATION?

Our vision is to capture pure, fresh-picked Pinot noir flavors. We gently place whole, uncrushed Pinot Noir clusters in a stainless steel tank, evacuate the oxygen, add yeast, seal the tank, and wait. An anaerobic (carbonic) fermentation ensues, with thousands of micro-fermentations inside each individual berry. We press the juice once ideal fruit character is expressed yet before stem tannins are absorbed.

The resulting wine is fresh and juicy, with low levels of tannin, bright acidity, and a gorgeous nose of a summer fruit salad. Because of its unique structure, this is our most versatile food wine, pairing with everything from pizza and barbeque to Thai and sushi.
